FOREST FIRE STATISTICS

Calendar Year 1945

This is a compilation of forest fire statistics covering the Calendar Year 1945 as reported to the United States Forest Service by its field offices, cooperating States, and the Department of the Interior, Soil Conservation Service, and Tennessee Valley Authority. The statistics shown are as complete as could be compiled from reports submitted by these agencies but no claim is made as to their completeness or authenticity.

The estimates on fire damage are admittedly low because they fail to include the vast amount of intangible and indirect losses resulting from forest fires, such as that caused by decay of fire damaged timber, replacement of desirable tree species by less valuable ones, soil deterioration and erosion, uncertain stream flow, destruction of game, interruption of tourist use and travel, and the like. Since no field organizations are established in unprotected areas to report fires, the statistics on such unprotected areas are merely the best estimates by local agencies.

The figures are shown separately by the individual States reporting and totals are also given for certain geographical groups of States. Group totals are shown following the individual State totals.

The tabulation is prepared in the following sections:

SUMMARY OF FOREST FIRE STATISTICS FOR 1945
Giving areas needing protection; areas protected and unprotected; number of fires, area burned, and estimated damage to both protected and unprotected forest lands (Pages 1 to 4).

NUMBER OF FOREST FIRES, BY CAUSE AND SIZE
For protected areas only (Pages 5 to 8).

AREAS BURNED AND ESTIMATED DAMAGE
For protected areas only (Pages 9 to 12).
